POST + VIDEO IDEAS

Hooks, carousel sequences, recurring playlists, systems and 100 simple MP4 reel concepts.

BUILD THE MACHINE. SKIP THE MOOD.

VOL. 01 · REVISED

HOW TO USE THE VAULT

S1 IS THE CONTRACT

S1 must leave something unfinished and point at a specific payoff on S2. Use a question, gap, comparison, first step, first receipt or clear swipe cue. If S1 can stand alone, rewrite it.

PAYOFF MOVES

S2 creates tension. S3-S5 deliver evidence, steps or reveals. The last slide closes with an action, save, comment or next episode.

ROTATE FORMATS

Do not run five list posts in a row. Mix audits, stories, tests, receipts, timed sessions, rules, maps and multi-part series.

BUILD PLAYLISTS

Ideas 101-200 are recurring shows. Keep the visual shell fixed so the audience recognizes the episode before reading it.

MP4 EASY MODE

Ideas 201-300 are designed to become real MP4 reels with almost no editing: one 1080x1920 still, hold it 7-10 seconds, add music, export as MP4.

VOICE

Short declaratives. Second person. Numbers when they help. No inflated language. Let the system and design carry the intensity.

GOGETTR CONTENT PRINCIPLE: MAKE THE NEXT SWIPE FEEL LIKE THE ONLY LOGICAL MOVE.

VIDEO VAULT

201-300

100 distinct reel/video concepts designed for simple static MP4 execution - no animation or advanced editing.

VIDEO VAULT · EASY MP4 RULES

These are video posts because the final file is MP4 - not because the design has to move.

1 STILL IS ENOUGH	Use one static 1080x1920 design, screenshot, photo or flat-lay.
7-10 SECONDS	Hold the still long enough to read. No animation required.
ADD MUSIC	Use a native platform audio track or simple background music.
EXPORT MP4	Export the still as a short video file. That is the entire edit.
KEEP TEXT LARGE	One hook, one visual idea, one caption CTA. Do not cram.
REPEAT SHELLS	Reuse the same visual template for a series, but change the idea.
